Rules of play:
Must follow suit. If cannot follow suit, play any card.

If dealt both ♣D's

If you are dealt both ♣D's you can either say 'normal game' (and then you will play a normal game as a 'silent solo' but no-one else will know) or you can say 'I have a wedding' which means you have both ♣B's and will partner with the first player (other than you) to win a trick. Of course, you can also bid to play any of the other solos if you wish.
